

I felt nervous, scared and anxious. The vaccine really hurt and it still hurts. I am excited for Lulu's Ice cream after school today!

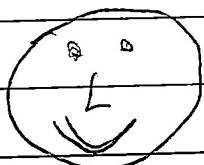

(COVID-19/11/6/21)

Lily 9/11/21

At first I was so scared and didn't want it to happen. When the nurse brought in the shot my heart was racing. My dad held my hand and when it happen I was ~~so~~ great. It barely hurt.

Before the shot I felt fine, when the shot happened it was not that bad to hurt. After it was over it still hurt a little weird but still doesn't hurt that much. I'm happy I got the shot I will soon feel more protected from COVID-19.

A little scared but it was fine
