

EGYPT KENNER

IF you are brave it won't hurt

It ^{COVID shots} hurt a little and
then it was over.

My name is Amir I took the vaccine and it didn't hurt at all. It felt like a short pinch and then I was back to normal. :)

My experience with the COVID vaccine was perfectly fine. It didn't feel like anything. It was very exciting for me because now I don't have to worry about anything.

It did not hurt just a little sting I just can't wait to be fully vaccinated just think it's a ~~pinch~~ pinch that's what I thought that's all I felt that is my experience.

Today saw the shot, I got really nervous. Then the shot was ready, I braced myself, I felt a poke in my arm "that's it?" I said, it was it, and there was nothing but a poke.
